Amendments to the Specification:

Please delete paragraph 19.5.

Please add the following paragraph [019.6] in the specification as follows:

[019.6] FIGURE 6: At a concentration of 1 mg of extracted latex to 1 mL of water the disclosed process yielding the extraction (CGO 110) results in a 4.3 fold reduction in absorbance at 414 nm. When sangre de grado or the extraction (CGO 110) at a concentration of 200 µg per mL of aloe vera gel were applied to aloe vera gel to mimic their administration as topical products, there was also a significantly lower color response with the extracted sangre de grado, CGO 110 vs. the parent botanical (* $P<0.0001$).
